

Project Description

This project involves the design and development of a fully functional, responsive web application using modern web technologies. It should demonstrate both front-end and back-end development capabilities.

Project Requirements

1. All required technologies must be implemented in the project.
 2. Each team member is responsible for developing at least three pages.
 3. The project must include a minimum of two forms.
 4. The website must be fully responsive and function properly on desktop, tablet, and mobile devices.
 5. All pages should maintain consistent navigation across the website.
 6. Forms must include basic input validation.
-

Project Criteria

- The number of students working on the project can range from 1 to 4. However, the minimum number of pages varies depending on the group size:
 - 1 student: minimum of 3 pages
 - 2 students: minimum of 6 pages
 - 3 students: minimum of 9 pages
 - 4 students: minimum of 12 pages
-

Project Phases

The project will be submitted in one phase:

- Must include React.js for frontend implementation (with HTML, CSS, and Bootstrap).
- Must include Node.js for backend and database integration.

Submission Requirements

The following must be submitted for evaluation and discussion:

- Running code, including a graphical user interface (GUI).
 - Soft copies of all code files.
 - A detailed report that includes:
 1. A comprehensive description of the application.
 2. Screenshots of the running program from all relevant interfaces.
 3. A clear description of the division of tasks among group members.
-

Guidelines

1. All team members must be present at the time of submission.
 2. No late submissions are allowed; students must adhere strictly to deadlines.
 3. Any plagiarism will result in a score of 0/10 for the entire group.
-
